

# Raghav Somani

First year Ph.D. student at  
**Paul G. Allen School of Computer Science & Engineering**  
**University of Washington**  
*Advisors: Prof. Sewoong Oh*

📅 April 9, 2020

## RESEARCH INTERESTS

I seek to solve theoretical machine learning problems using ideas from optimization, high dimensional probability and statistics.

<b>Major Interests</b>	Machine Learning, Large Scale Optimization, High Dimensional Probability
<b>Others</b>	Random Matrix theory, Learning Theory, Applied Mathematics

---

## EDUCATION

- **University of Washington**  
*Ph.D. in Computer Science and Engineering* *Sept '19 - Present*  
*Advisor: Prof. Sewoong Oh*
- **Indian Institute of Technology Guwahati**  
*Bachelor of Technology in Mathematics and Computing* *July '13 - June '17*  
**GPA: 9.10/10** (9.30/10 in major courses)

---

## WORK EXPERIENCE

- **University of Washington - Graduate Research Assistant** *Sept '19 - Present*  
*Advisor: Prof. Sewoong Oh*  
Machine Learning Lab
- **Microsoft Research India - Research Fellow** *July '17 - July '19*  
*Advisors: Dr. Praneeth Netrapalli & Dr. Prateek Jain*  
Project group - Provable Non-convex Optimization for Machine Learning Problems
- **Microsoft Research India - Research Intern** *May '16 - July '16*  
*Advisor: Dr. Sreangsu Acharyya*  
Project - Recommendation systems
- **CAFRAL, Reserve Bank of India - Summer Research Intern** *June '15 - July '15*  
*Advisor: Prof. Nagpurnanand R. Prabhala*  
Project - Modeling 'Economic Policy Uncertainty Index' for India

---

## PUBLICATIONS

### Conferences

1. **Non-Gaussianity of Stochastic Gradient Noise.** [arXiv]  
A. Panigrahi, **R. Somani**, N. Goyal, and P. Netrapalli.  
*Science meets Engineering of Deep Learning (SEDL) workshop, Neural Information Processing Systems (NeurIPS), Vancouver, Canada, December 2019.*
2. **Support Recovery for Orthogonal Matching Pursuit: Upper and Lower bounds.** [paper]  
**R. Somani**<sup>\*</sup>, C. Gupta<sup>\*</sup>, P. Jain, and P. Netrapalli.  
*Advances in Neural Information Processing Systems (NeurIPS), Montréal, Canada, December 2018. Spotlight Presentation (168/4856 submissions).*
3. **Clustered Monotone Transforms for Rating Factorization** [paper]  
**R. Somani**<sup>\*</sup>, G. Hiranandani<sup>\*</sup>, O. Koyejo, and S. Acharyya.  
*ACM International Conference on Web Search and Data Mining (WSDM), Melbourne, Australia, February 2019.*

## Preprints

1. **Meta-learning for mixed linear regression** [\[arXiv\]](#)  
W. Kong, **R. Somani**, Z. Song, S. M. Kakade, and S. Oh.
2. **Soft Threshold Weight Reparameterization for Learnable Sparsity.** [\[arXiv\]](#)  
A. Kusupati, V. Ramanujan\*, **R. Somani\***, M. Wortsman\*, P. Jain, S. M. Kakade, and A. Farhadi.

\* - equal contribution

## RESEARCH PROJECTS

**Optimization and Generalization in Deep Neural Networks** *July '18 - Sept '19*  
*Advisors: Dr. Prateek Jain, Dr. Praneeth Netrapalli & Dr. Navin Goyal, Microsoft Research*

- Understanding the dependence of batch-size (stochasticity), over-parameterization, and optimization on the generalization properties of a variety of neural networks on real world data distributions for classification tasks.
- Analyzing the dependence of support separation, number of hidden neurons, ambient dimension of data distribution, number of training points on optimization and generalization of neural networks.
- ★ A [work](#) on distributional characterization of SGD got accepted at the workshop **SEDL '19** at **NeurIPS '19**.

**Sparse Regression and Optimal Bounds for Orthogonal Matching Pursuit (OMP)** *Sept '17 - June '18*  
*Advisors: Dr. Prateek Jain & Dr. Praneeth Netrapalli, Microsoft Research* [\[Project page\]](#)

- Analyzed Accelerated IHT, trying to strengthen [Jain et al.](#)'s results for better support expansion and generalization.
- Analyzed OMP for the Sparse Linear Regression problem under Restricted Strong Convexity (RSC) assumptions obtaining its support recovery and generalization guarantees. Also provide tight lower bounds for OMP. Our results are the first such matching upper and lower bounds (up to log factors) for *any* Sparse Regression algorithm under RSC assumption.
- ★ Accepted for a **Spotlight** paper presentation at **NeurIPS '18**. [\[Spotlight video\]](#)

**Clustered Monotone Transforms for Rating Factorization (CMTRF)** *May '16 - Aug '18*  
*Advisors: Dr. Srengsu Acharyya (MSR India) & Prof. Oluwasanmi Koyejo (UIUC)* [\[Project page\]](#)

- Implemented and analyzed CMTRF for recommendation systems which performs regression under shared low-rank structure up to unknown monotonic transforms for a better fit. CMTRF recovers a unique solution under mild conditions and also outperforms other state-of-the-art baselines on 7 real-world and 2 synthetic datasets.
- ★ Accepted for an oral presentation at **WSDM '19**. [\[arXiv\]](#)

**Approaches of Building Recommendation Systems** *Aug '16 - Apr '17*  
*Advisor: Prof. Arabin K. Dey, Bachelor Thesis Project, IIT Guwahati* [\[Thesis Report\]](#)

- Worked on order preserving Regularized Matrix factorization. Used the Empirical Bayes framework to tune hyper parameters for priors used in the Bayesian setup of collaborative filtering.
- Implemented a content similarity based recommendation system by using k-Nearest Neighbors over the dominant eigenspace of the user and item features extracted via matrix factorization.
- Used Auto-encoders, Restricted Boltzman Machines and Deep Belief Networks for feature extraction from various data domains like rating matrices, images and text to build similarity based recommendation systems.

---

## RELEVANT COURSES AND ELECTIVES

<b>Machine Learning</b>	Machine Learning, Learning from Data (Caltech MOOC), Statistical Learning (MOOC)
<b>Optimization</b>	Theory of Optimization and Continuous Algorithms, Convex Optimization (Stanford MOOC)
<b>Probability</b>	Probability and Random Processes, Advanced Probability, Monte Carlo Simulations
<b>Statistics</b>	Advanced Statistical Algorithms, Statistical Methods and Time Series Analysis
<b>Computer Science</b>	Design and Analysis of Algorithms, Discrete Mathematics
<b>Others</b>	Linear Algebra, Calculus, Real and Complex Analysis, Stochastic Calculus, Matrix Computation, Scientific Computation, Modern Algebra
