## RESEARCH PROJECTS

**Optimization and Generalization in Deep Neural Networks** July '18 - Sept '19  
*Advisors: Dr. Prateek Jain, Dr. Praneeth Netrapalli & Dr. Navin Goyal, Microsoft Research*

- Understanding the dependence of batch-size (stochasticity), over-parameterization, and optimization on the generalization properties of a variety of neural networks on real world data distributions for classification tasks.
- Analyzing the dependence of support separation, number of hidden neurons, ambient dimension of data distribution, number of training points on optimization and generalization of neural networks.
- ★ A [work](#) on distributional characterization of SGD got accepted at the workshop **SEDL '19** at **NeurIPS '19**.

**Sparse Regression and Optimal Bounds for Orthogonal Matching Pursuit (OMP)** Sept '17 - June '18  
*Advisors: Dr. Prateek Jain & Dr. Praneeth Netrapalli, Microsoft Research* [\[Project page\]](#)

- Analyzed Accelerated IHT, trying to strengthen [Jain et al.](#)'s results for better support expansion and generalization.
- Analyzed OMP for the Sparse Linear Regression problem under Restricted Strong Convexity (RSC) assumptions obtaining its support recovery and generalization guarantees. Also provide tight lower bounds for OMP. Our results are the first such matching upper and lower bounds (up to log factors) for *any* Sparse Regression algorithm under RSC assumption.
- ★ Accepted for a **Spotlight** paper presentation at **NeurIPS '18**. [\[Spotlight video\]](#)

**Clustered Monotone Transforms for Rating Factorization (CMTRF)** May '16 - Aug '18  
*Advisors: Dr. Sreangsu Acharyya (MSR India) & Prof. Ohuwasanmi Koyejo (UIUC)* [\[Project page\]](#)

- Implemented and analyzed CMTRF for recommendation systems which performs regression under shared low-rank structure up to unknown monotonic transforms for a better fit. CMTRF recovers a unique solution under mild conditions and also outperforms other state-of-the-art baselines on 7 real-world and 2 synthetic datasets.
- ★ Accepted for an oral presentation at **WSDM '19**. [\[arXiv\]](#)
